

# **SURETERIC<sup>®</sup>**

AQUEOUS ENTERIC COATING SYSTEM

For consistent reproducible enteric results, time after time.

Sureteric® is a proprietary fully formulated aqueous enteric coating system. The product has been carefully designed to meet the needs of the pharmaceutical industry in the development and commercialization of delayed release oral solid dosage forms.

Formulated using a unique blend of poly-vinylacetate phthalate (PVAP) as the pH dependent polymer, plus plasticizers and other performance enhancing ingredients, Sureteric protects the dosage form from gastric fluids and the rigors of handling, packaging and storage. Sureteric delivers superior productivity and performance, while being simple to prepare and easy to use.

### Speed Your Enteric Product to Market

- Fully formulated system simplifies product development, technical transfer and scale-up
- Applicable to tablets, pellets, beads and granules, complete flexibility for the preferred formulation
- Extensive history of use in pharmaceutical products with established regulatory acceptance
- Backed by a network of technical support facilities, applications data and coating expertise

### Consistent Performance Every Time

- Low permeability coating with excellent resistance to gastric fluids
- Enteric polymer protects against acid media and dissolves above pH 5.0 ensuring targeted release
- Reproducible performance with no curing steps required.
- Based on the superior chemistry of PVAP from Colorcon.

### Enhance Productivity and Minimize Cost

- Optimized formulation can be used in a variety of coating equipment and processing conditions
- Excellent film-forming characteristics with minimal tackiness allows for rapid processing
- One dry ingredient simplifies quality analysis and inventory management
- Easy preparation and clean up.

Full supporting product and applications literature is available through the Colorcon website.

## Deliver high-performance products — with Colorcon

Choose Colorcon, leader in pharmaceutical solid oral dose solutions, as a formulation partner in every phase of your product development. Our solution capabilities originate from two main areas of expertise:

### Formulation Technologies:

- Full range of functional excipients
- Technologies for development and production of delayed/enteric release and extended/controlled release tablets and multiparticulates
- HyperStart® service and extensive applications data to provide starting formulations to save you development time and money
- Extensive formulation know-how and technical support to achieve the exact drug release profile desired

### Film Coatings:

- Optimized formulations specifically for your application and regulatory needs including customized colors and color matching
- Innovative products for mechanical integrity, gloss, pearlescence, and environmental protection
- Brand enhancement concepts, consulting and services to build a strong brand image and stand out from the competition

From formulation and tablet design through product differentiation and branding, Colorcon gives you everything you need to deliver high-performance products.
