

Access Our Capabilities to Reduce Your Development Time

Getting Started – Proof of Concept for Oral Solid Dosage Forms

Access confidential and complimentary concept formulation design, supported with characterization capabilities, directly with Colorcon experts.

Excipient Selection – Process and Characterization Capabilities

Colorcon provides extensive experience and technical knowledge for the formulation development of oral solid dosage forms—immediate, modified and targeted release. We provide proof of concept formulation development, and then in turn assist clients with scale-up development, process optimization and technology transfer.

Reach Your New Drug Product Milestone Faster with Colorcon

- Access to Experts and Equipment for Trials
- Processing and Characterization Capabilities

From Core to Coating,
Your Formulation Partner of Choice

www.colorcon.com

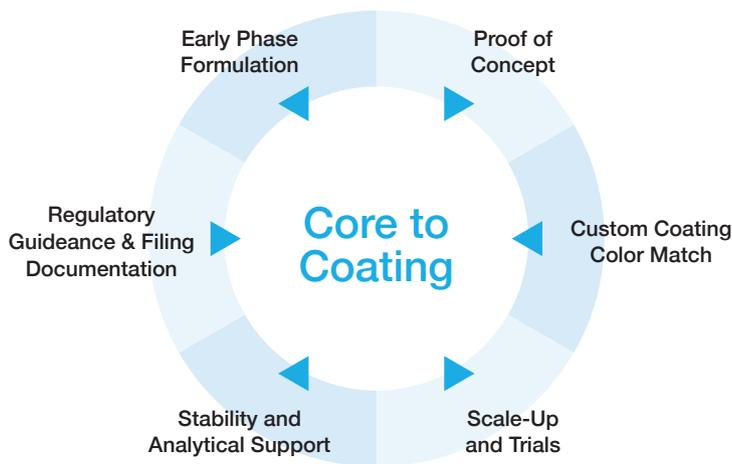

We address your needs in early-stage development so formulation is streamlined and results in a high-quality product.

Extensive Portfolio of Equipment and Services for Formulation Development

Our capabilities include:

- Powder flow analysis
- Wet granulation
- Direct compression
- Roller compaction (simulation)
- IMA Dosator capsule filling
- Fluid bed tablet/particulate coating
- Minitabs
- Compaction & hardness profiling
- Disintegration testing
- Friability testing

We develop prototype dosages using even limited quantities of API, typical during early phase development.

Deliver High Performance Products - with Colorcon

Choose Colorcon, leader in pharmaceutical solid oral dose solutions, as a formulation partner of choice in every phase of your product development.

Film Coatings:

- Optimized formulations specifically for your application and regulatory needs including customized colors and color matching
- Innovative products for mechanical integrity, gloss, pearlescence and environmental protection
- Tablet design concepts, consulting and services to build a strong brand image and stand out from the competition.

Formulation Technologies:

- Full range of functional excipients
- Technologies for development and production of delayed/enteric release and extended/ controlled release tablets and multiparticulates
- HyperStart® service and extensive applications data to provide starting formulations to save you development time and money
- Extensive formulation know-how and technical support to achieve the exact drug release profile desired.
