## Silk-Screen Adhesive SP310\*

Water Based, Screen-Printable Adhesive for Temporary Tattoos

NT19ADH (12/14)

### **Product Description:**

**Silk-Screen Adhesive SP310** was specifically formulated for temporary tattoos. A water-based emulsion, SP 310 contains less than 0.5% VOC's; only water is evaporated during processing. SP310 exhibits ideal viscosity and rheology with great leveling. This results in a smooth, professional adhesive layer that maximizes skin contact and extends tattoo life. **NOTE: This adhesive is designed for use on a printing press. It is not intended to be applied directly to the skin in its wet state.** 

#### **Application / Use:**

SP310 is recommended for mesh counts of 60 through 230 tpi. Although its shear-thinning qualities allow a wide range of mesh counts to be used, typically 110 tpi mesh provides ideal adhesive thickness for temporary tattoos.

Prep: Mix adhesive thoroughly before use

Screen: 110 tpi mesh

Stencil: Image Mate DZ 343 photoemulsion (no hardener required)\*

Printing environment: 50% or higher relative humidity

Drying: Hot air dryer for rapid curing; racking in a dry area (< 50%

humidity) Cured: Adhesive will be optically clear when thoroughly dry

Stencil cleaning: Hot water for wet adhesive; dry adhesive can be removed readily using acetone.

#### **Physical Properties:**

Polymer Type: Acrylic copolymer emulsion Appearance: White liquid, dries clear Viscosity / Rheology: ~ 13,000 cps / thixotropic

Solids: 58 - 62 % pH: 3.7 - 4.7 Wt. per gallon: 8.6 lbs.

VOC content: < 0.5% by wt. (calculated)

Freeze/Thaw Stable: No

Shelf life: 1 year minimum

#### **Compliance Information:**

Non-irritant as defined by 16 CFR 1500.3(C)(4); Complies with California

Proposition 65

SP310 does not contain any FDA cosmetic restricted substances

SP310 does not contain any animal products or byproducts
