

Your Formulation Partner™ for Solid Oral Dosage Development

Reach Your New Drug Product Milestone Faster with Colorcon

Development of new drug products is time consuming and costly. It is important to choose the right collaboration partner for your formulation and excipient selection.

Colorcon can help to reduce your project time by providing support for concept formulation, with excipient selection and process guidance.

Brand Enhancement and On-Dose Protection

- Make informed decisions about your tablet design to improve patient safety and medication adherence
- Safeguard your brand's integrity with on-dose authentication

Access to Expertise = Speed to Market

Best-in-Class Products for Solid Dosage Forms

- Get a head start with direct online access to HyperStart®, a confidential formulation service with proven success from start-ups to innovator companies
- Access concept (non-GMP) formulation design, supported with characterization capabilities

Global Regulatory Expertise

Access to Experts and Equipment for Trials

- Technical expertise to ensure a robust and scalable manufacturing process
- Regulatory support, with fast online access to documentation to minimize filing delays

Processing and Characterization Capabilities

From Core to Coating,
Your Supplier of Choice®

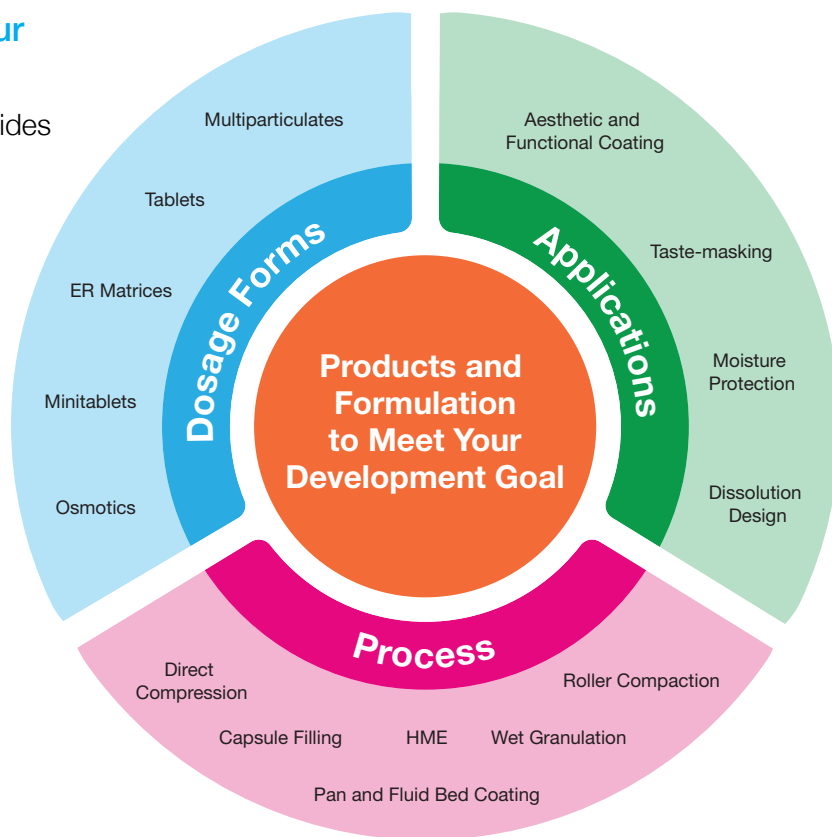

Access Our Expertise to Reduce Your Development Time

Strategically located, Colorcon's network provides fast access points to our technical experts, equipment and formulation laboratories in 21 locations around the world.

From Core to Coating, our global footprint of manufacturing, technical services and support brings you best-in-class excipients, process and characterization capabilities, when and where you need it.

Our partners range from small start-ups and consultants in formulation through to CRO, CDMO and multinational innovator and generic companies, around the world.

Whatever your oral drug development challenge—there's a solution ready for you.

To facilitate the use of Colorcon's products, we offer complimentary services through HyperStart® formulation and small-scale trials.
