

NUTRATERIC™

Nutritional Enteric Coating System

- Specifically designed and approved for use in dietary supplement applications
- Unique delayed release coating system
- Add value and functionality to nutritional products

Delayed release coatings are a convenient and effective way to improve consumer appeal of dietary supplement products by reducing unpleasant flavors and odors, enhancing the stability of natural ingredients and improving product performance.

Nutrateric is an aqueous enteric coating system designed specifically to meet the regulatory requirements for dietary supplement, nutritional and herbal products. Tablets and capsules can be easily coated using standard processing equipment with reliable and reproducible enteric protection.

Approved for Use in Dietary Supplement Products

- Unique technology specifically developed for nutritional applications
- Meets the regulatory requirements for dietary supplement, nutritional and herbal products in Europe, the United States and North America regions
- Composed of ingredients that are approved food additives or have self-affirmed GRAS status
- Meets dietary supplement enteric disintegration requirements

Reliable and Reproducible Performance

- Fully aqueous coating system which is simple to prepare and apply
- Optimized for use on tablets and soft gelatin capsules
- Meets dietary supplement enteric disintegration requirements
- Backed by world class technical service and manufacturing of Colorcon

Cost Effective Technology

- Enteric protection can be achieved at low levels of coating
- Fast application using standard processing equipment
- Reduced raw material inventory and testing requirements

Adds Value to Your Product

- Delayed release differentiates your product in a competitive marketplace
- Enhanced functionality enables premium positioning
- Consumer appeal through product presentation and performance

Full supporting product and applications literature is available through the Colorcon website.

Deliver high-performance products — with Colorcon

Choose Colorcon, leader in pharmaceutical solid oral dose solutions, as a formulation partner in every phase of your product development. Our solution capabilities originate from two main areas of expertise:

Film Coatings:

- Optimized formulations specifically for your application and regulatory needs including customized colors and color matching
- Innovative products for mechanical integrity, gloss, pearlescence, and environmental protection
- Brand enhancement concepts, consulting and services to build a strong brand image and stand out from the competition

Formulation Technologies:

- Full range of functional excipients
- Technologies for development and production of delayed/enteric release and extended/controlled release tablets and multiparticulates
- Extensive formulation know-how and technical support to achieve the exact drug release profile desired

From formulation and tablet design through product differentiation and branding, Colorcon gives you everything you need to deliver high-performance products.
