

Real-world conditions demand real protection.

Colorcon's Controlled Atmosphere Packaging helps protect product integrity so medications and supplements perform exactly as intended for those who need them most.

Real-world conditions that threaten stability:

Moisture

Oxygen

Odor

Temperature

Unmanaged exposure leads to:

Product Degradation

Reduced Efficacy

Limited Shelf Life

Waste & Regulatory Risk

The right packaging protects product integrity:

Protection you can trust.

We bring deep understanding and expertise to pharmaceutical formulation and development.

Control the environment. Protect the product.

We apply the right level of atmospheric control so product performance holds from production to end use.

Packaging selection matters.

As the last line of defense, we ensure product integrity is never compromised.

Real-world conditions demand real protection.
