

## **NO-TOX EDIMARK<sup>®</sup>** (EDIBLE INK PRINTING SYSTEM)

NT36EDI-D  
(12/14)

- Product Type:** Edible dye-based inks.
- General Description:** Edimark dye-based inks are specifically designed for edible substrates for pharmaceutical, food, or confectionery applications. These inks are water soluble after printing so exposure to moist conditions should be avoided.
- Printing system:** Edimark inks can be formulated for piezoelectric printing, thermal inkjet and continuous inkjet printing, as well as for flexography, rotogravure, dry offset, pad and silk screening.
- Flush\*:** Each Edimark inkjet ink can be supplied with a compatible flush for printing system flushing and cleaning.
- Special Handling Procedures:**
- Viscosity:** Supplied at the appropriate viscosity for the printing method or as otherwise requested by the customer.
- Clean-up:** Use only the compatible flush or water for system cleaning.
- Color availability:** As requested by the customer or prospect and varies by application method and chosen substrate.
- FDA compliance:** Edimark formulas can be submitted to the FDA for inclusion in Colorcon No-Tox Products' Drug Master File #17155 and are manufactured under strict cGMP guidelines in our dedicated facility. All components are direct additives for either food or drug products, depending on the intended end-use.

\*Note: Use No-Tox supplied flush only for jetting applications.
