COLORCON ENVIRONMENTAL POLICY

Colorcon Limited employs over 250 staff and provides formulated/unique coatings, excipients and modified release systems for use in solid oral dosages within the pharmaceutical and nutritional industries in its designated sales regions.

The company is located on a light commercial business park near to the Dartford River Crossing in Kent, a short distance from a lake which provides a home to flora and fauna and is a recreational resource to local people, many of whom work on the business park.

The company leadership is committed to:

Protecting our local and global environments;

Preventing pollution to air, land and watercourses from our processes and products;

Complying with our legal and other obligations, including those voluntarily agreed with interested parties, which together make up our compliance obligations;

Monitoring and evaluating our compliance with these obligations;

Monitoring our performance in the use of energy and water;

Reducing our wastes and disposing them by the best environmental/cost options;

Setting objectives to develop and continuously improve our Environmental Management System;

Monitoring these objectives and addressing potential associated issues;

Assessing and controlling our environmental impacts;

Assessing our environmental risks and opportunities;

Communicating with and garnering the engagement of our employees' awareness and competences to enable them to support this policy and provide feedback on the systems performance through a Business Partner approach and other consultation forums;

Using the plan-do-check-act approach to ensure we continually improve our systems and our environmental performance;

Communicating with interested parties to ensure we are able to fulfil their requirements;

Seeking similar standards of performance from our supply chain partners.

This policy is available on our corporate website, on request by interested parties and internally throughout our site.

Signed:
Dave F Bain
Managing Director, Colorcon EMEA
